

CARATTERISTICHE PRINCIPALI

ICT 3K is the most robust and compact **motorized hybrid card reader** currently available on the market. It combines high performance and reliability in an **exceptionally compact design**. It features a full anti-vandal and anti-pollution shutter, with a mechanical switch that detects the width of the inserted card. In the event of a power failure, ICT 3K automatically releases the card. It is equipped with RS232 and mini-USB interfaces and can be configured with an optional SAM module, with support for expansion up to four external SAM modules. ICT 3K is ideal for applications such as internet kiosks, payment systems and self-service solutions.

SCHEDA TECNICA

Type	Motorized
Magnetic Stripe	3 track read (ISO 7811)
IC Contact	Read/write (ISO 7816)
Certified	EMV 4.3d
Shutter	Full plastic shutter, anti-vandal and anti-pollution
Software	DLL Available
Interfaces	RS232; mini USB;
Capture function	Possible
Card detect	By card width sensor
Power supply	+12 Vdc
MCBF	600K mag. passes; 1M motor
Dimensions	97 x 167.5 x 43 mm
Options	SAM module on-board (possible expansion to up to 4 external SAM modules)
