

KPM862

KPM862 is the only compact airport printer able to combine **metallic structure, high speed and refined design together with a lower TCO** (Total Cost of Ownership). KPM862 offers efficient and innovative functionalities like the **auto-calibration**, that avoid the waste of paper through auto-calibrating sensors that can adapt to an infinite number of media types. The **multi feeder** version is useful for reducing waiting times by increasing printing volumes, the **RFID** configuration allows you to have a product already prepared for future needs. **Veriprint®** technology allows to instantly validate the barcode of a bag tag or boarding pass preventing a baggage or a passenger are checked-in but carrying an unreadable luggage tag / barcoded boarding pass. TK862 is compatible with **AERO VCOM SERVICE** which supports the most sophisticated AEA communication standards and allows per-airline **dedicated configurations** within standard AEA parameters.

CARATTERISTICHE PRINCIPALI

Among the indicated features are **Ultra resistant, Highly reliable and robust, Very fast and powerful**, the same model for ATB and BTP, and Contact Imager (CIS) sensors for detecting empty spaces instead of traditional black notch sensors, to improve reliability and reduce cleaning operations and to virtually align with any brand/hole/logo.

Other listed elements include **Veriprint Barcode Validation (optional), Extra resistant cutter**, RFID (optional), Prevention of Damaged Dot, Automatic ticket length detection, and Complete paper auto-loading without waste.

SPECIFICHE TECNICHE

Options	RFID
Strenght	Ultra Heavy Duty
Usage	ATB;BTP;GPP

MODELLI DISPONIBILI

CODICE	DESCRIZIONE
