

Mach 1005

Check-out scale with load plate that can be integrated into the cash desk. Mach 1005 CK can be easily interfaced with management systems and sale programs at the checkout point through its Dialog02 and Dialog06 protocol; thanks to this communication language, the transaction - including calculation of the amount - has legal value; therefore, it can be used in an approved POS or cash register and included in the tax document (Ticket, Receipt or Invoice) for the customer.

CARATTERISTICHE PRINCIPALI

Among the indicated features are **Checkout scale with integrated merchandise tray that can be connected to the cash register. Mach 1005 CK can be easily interfaced with management systems and sales programs at the Point of Sale because it supports the Dialog02 and Dialog06 protocols; thanks to this communication language, the transaction with amount calculation has legal value and can therefore be used in an Omologated POS or fiscal meter and included in the fiscal document (Receipt, Invoice or Ticket) for the customer.**
