

MT15

CARATTERISTICHE PRINCIPALI

Touch monitor with LED backlit panel, high brightness of 1000 nits, MT15 offers high contrast quality and a sunlight-readable solution. **The capacitive touch screen provides a multi-touch gesture input application. The touch screen is sealed with a bezel and protected with IP65 on the front side to prevent the ingress of liquids and dust.** The product is designed for vertical VESA mounting, compatible with HID for easy integration with thin clients. It has worldwide safety approvals, including: TUV, CE, UL, CUL, FCC-B, RoHS, and IPX1.
