

CARATTERISTICHE PRINCIPALI

Among the features listed are **QD2 represents the latest evolution of Custom's customer display. Now available with two different interfaces, USB 2.0 full speed and RS232 (only for fiscal printers), it can be connected to any PC POS. The display is based on backlit liquid crystal technology, and the 40 characters available (20 x 2 lines) allow you to create the desired phrases, messages, and drawings on the display. The device is upgradable and configurable with the PrinterSet software. Thanks to the included extension tube, QD2 is adjustable both in high and low versions.**
